

Dear hiring manager,

I would like to be considered for the Artist role at Monarc Gaming Labs. With my strong technical skills in Photoshop, Illustrator, Maya and Unity combined with my education and experience in digital painting, UI/UX design, animating, 3D modeling/texturing, game development and game design, I am convinced that I would be a valuable asset to the art team.

I am impressed by Monarc Gaming Labs' accomplishment and leadership in social mobile casino market. My vivid imagination and proven ability to bring game concepts to life through art is a perfect match for Monarc Gaming Labs' amazing culture and genre. Additionally my cross-cultural exposure and fluency in English and Chinese taught me how to establish lasting professional relationships. I embrace change, seek out opportunities to learn, and focus on success.

I bring with me my passion for 2D art rendering, 3D modeling and texturing, and my experience in Unity game development at NYU Game Center. With a Multimedia undergraduate degree, a Master of Fine Art degree in Game Design and work experiences in the advertising industry, I developed strong insight of artistic vision, solid skills in Photoshop, Illustrator, Maya modeling and Unity C# programming, as well as problem-solving and team-work abilities. As a game artist and game developer, I was responsible for game art assets creation, Unity C# programming and performance optimization for PC, console and mobile platforms. During my MFA program, I developed 3 solo games and 2 games in team projects, fully responsible for visual design, 3D game assets modeling, framework programming, game polishing and cross-platform optimization. I was responsible for 3D environment/character modeling and game assets creation in team project ([Rayha's Poem](#)). I also assisted NYU professors in classes and toured 28 NYU students on Unity, Photoshop, Maya and C# programming.

I am a quick learner and I work hard to get the job done while building strong relationships with all team members. The Artist role is a perfect opportunity that would give me a chance to learn and grow with Monarc Gaming Labs, a company that I'm passionate about. I would love to further discuss how I could contribute my skills and experiences to the art team at Monarc Gaming Labs. Thank you for your consideration and I look forward to speaking with you soon.

Sincerely,

Gordon Lee (Cunbo Li)
